

A PRODUCT OF AUTOMATED PACKAGING SYSTEMS

## The Autobag® PaceSetter™ HB-25, HB-55 and HB-65 Tabletop Baggers — A cost-effective alternative for low-volume bag packaging

The Autobag PaceSetter line of baggers offers a cost-effective solution for hand load bag filling and sealing applications. The HB-series of PaceSetter baggers are available in three models, each featuring portability, ease of use, and versatility for low-volume bagging operations.

PaceSetter HB-series baggers operate at speeds from 10 to 20 bags per minute by presenting a pre-opened bag for fast and convenient hand loading. The all-electric, tabletop design does not require compressed air to run, and the small footprint frees up

valuable warehouse space. PaceSetter configurations can include automatic or manual bag indexing, coupled with an integrated manual or OneTouch™ heat sealer. A product load tray\* and optional funnels add convenience and increase bag packaging speed.

The simple, ergonomic bag supply area of the PaceSetter bagger enables fast and easy bag changeovers. PaceSetter baggers accommodate a wide range of bag sizes and materials, which are available in a variety of stock or custom styles. Special bag features, such as hanger holes, vent holes or headers are also available.

Using system-matched Autobag pre-opened bags-on-a-roll, the PaceSetter HB-series of tabletop baggers offer a versatile and cost-effective hand load packaging solution.

### User Benefits

- Pack faster than by hand – Up to 20 bags per minute
- Operator-friendly system is easy to set up and operate
- Compact and lightweight for tabletop use
- All-electric design does not require compressed air to run
- Accurate bag positioning ensures precise loading
- Autobag pre-opened bags improve productivity for hand load applications
- Fast, simple bag changeover

\*Product load tray standard on HB-65 model; Optional on HB-25 and HB-55 models.
